Complete Systems

SNP

THE
SPRAY NOZZLE
PEOPLE

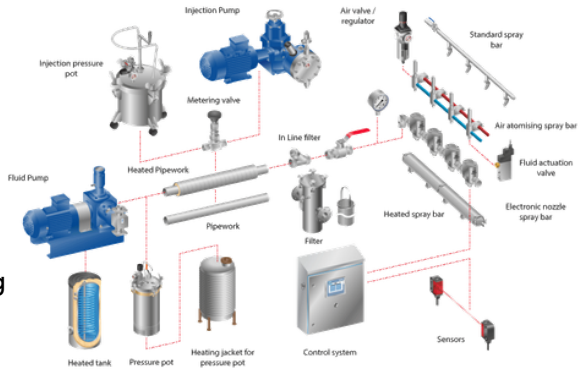

Achieve Consistent Performance, Optimised Processes, Reduced Downtime

Spray Systems

SNP designs and delivers complete spray systems, working backwards from the nozzle to ensure the optimal setup for your spray application and process goals.

Applications we have designed systems for include:

- Coating
- Dust suppression
- Foam suppression
- Lubrication
- Cleaning
- Storm tank cleaning

And many more.

Spray Bars

We offer easy-to-configure spray bars for applications such as coating, washing, cooling, moistening, lubricating, cleaning and disinfecting. While spray bars are most commonly used with hydraulic nozzles, they can be used with all nozzle types including air actuated nozzles, air atomising nozzles and electric nozzles such as the EHP series.

Why Choose Our Spray Bars

- ✓ Quick specification
- ✓ One-stop shop for design, manufacture and delivery
- ✓ Designed for new spraying applications and easy retrofit to existing spray lines
- ✓ Compliant to ISO 9001

Nozzles

Ensure Product Quality,
Optimise Processes, Minimise Downtime

THE
SPRAY NOZZLE
PEOPLE

Hydraulic, Air Actuated, Air Atomising & Electric

A spray nozzle is a simple device used to break apart a fluid flow into a spray pattern. Yet, despite this apparent simplicity, there are more than 40,000 variations in our range, reflecting the multitude of ways different industries need to spray various fluids.

We work with you and apply our decades of experience to ensure you get the correctly specified nozzle for your individual spray process.

Our range includes:

- Flat fan, full cone, hollow cone, straight jet, misting nozzles
- Air actuated nozzles
- Air atomising nozzles
- Electric nozzles
- Special purpose nozzles

Custom Nozzle Solutions

We often work with customers to design custom nozzles for new applications. We have at our disposal a world-leading spray lab and access to BETE's design engineers so we are confident that even the most obscure and demanding spray applications can be accommodated. We can also supply nozzles in non-standard materials.

Spray Accessories

We advise on and offer spray accessories such as strainers, bushings, manifolds, fluid regulator valves, air regulators, nozzle holders, solenoid valves, adaptors and the Innoquest range of SpotOn® spray calibrators.

Tank Wash

Save Water, Chemicals,
Labour, Reduce Downtime

SNP

THE
SPRAY NOZZLE
PEOPLE

Hygienic Tank Wash Solutions

We offer a versatile range of tank wash systems and nozzle heads in 316 stainless steel and other materials, suitable for all tank sizes, shapes and residue types - designed to reduce water use and improve cleaning efficiency.

Includes:

- Rotary jet cleaning heads (including fast-cycle cleaners)
- Spinners
- Spray balls
- ATEX-certified cleaning heads
- Non-clogging designs for high-particulate liquids
- Mounting accessories (swing arms, downpipes)
- Pumps, filtration and other accessories

Industrial Tank Wash - StormBlaster™ & ScreenBlaster

The StormBlaster™ and ScreenBlaster™ are powerful rotary jet cleaning heads designed for large stormwater attenuation tanks and Combined Sewer Overflow (CSO) screens. They help prevent odour pollution and extend asset life through effective, repeatable cleaning.

Key Features:

- High-impact cleaning jets with throw lengths up to 25 m
- Fully sealed gearbox, suitable for muds and high-particulate cleaning media
- Stainless steel construction for minimal maintenance and long service life
- SNP StormBlaster™ system sizing protocol, ensuring effective cleaning of tanks of any size or shape

IBC Cleaning

Save Water and Chemicals,
Reduce Downtime, Free Up Staff

SNP

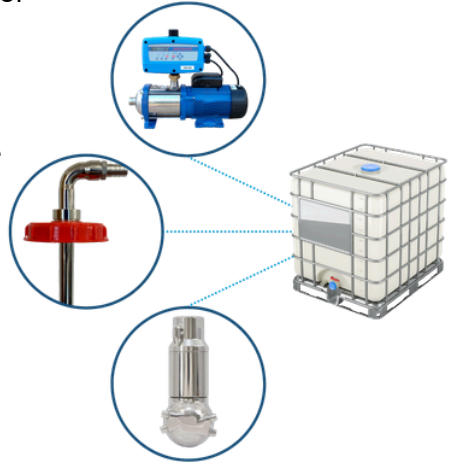

THE
SPRAY NOZZLE
PEOPLE

The IBC Cleaning Kit

SNP has developed an IBC Cleaning Kit for fast, effective cleaning of IBC totes. Simple to operate, the system can run unattended once set up, reducing the need for constant supervision.

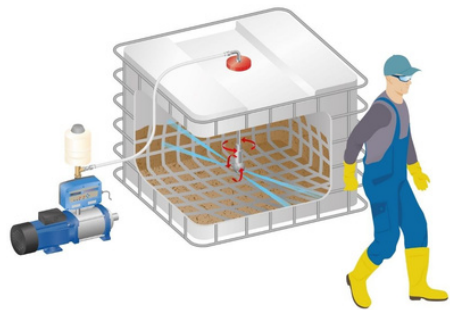

Using the powerful Orbitor Eco rotary jet nozzle, an IBC can be thoroughly cleaned in under five minutes. The kit can also be adapted for cleaning small to medium-sized tanks.

Ideal for businesses cleaning between 5-50 IBCs per week, it offers a reliable and efficient cleaning solution.

The Kit Includes:

- Fast-cycle rotary jet cleaning head (Orbitor Eco) & down pipe
- Pump with control panel
- Feed kit and outlet hose
- Expansion tank

Sanitisation

THE
SPRAY NOZZLE
PEOPLE

Simplify Protocols, Meet Hygiene Standards, Reduce Chemical and Water Usage

Washdown & Sanitisation Solutions

Lafferty and Meritech products bring improved compliance and safety as well as greater operational efficiency, ensuring that every stage of the cleaning and sanitising process is controlled, consistent and fully aligned with industry standards.

Conveyor Cleaning Solutions

Lafferty's Conveyor-Mate™ is an easy-to-install system for cleaning both the top and underside of conveyors. Available in fixed or portable versions as a sprayer or foamer.

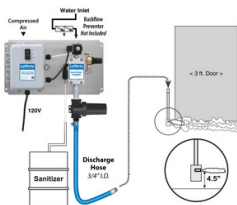

Foamers, Foggers & Sprayers

Lafferty's range includes mobile and fixed spray guns and applicators for spraying, fogging and foaming.

Proportioners & Mixing Stations

Venturi injection systems from Lafferty use mains water pressure to draw and blend chemicals, creating an accurately diluted solution.

Entryway Sanitisation Systems

Lafferty Entryway Foamers provide a freshly-diluted, automated chemical barrier, delivering a sanitising solution that scales from narrow employee walk doors to 4.9 m-wide overhead bays.

Hand & Footwashing Stations

Automated systems from Meritech improve employee hygiene and remove human error so that facilities stay free from 99.9% of harmful pathogens.

Pre-Treatment

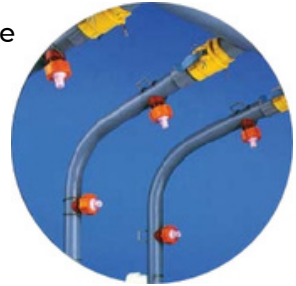

Minimise Downtime, Improve Spray Quality, Reduce Operator Exposure

THE
SPRAY NOZZLE
PEOPLE

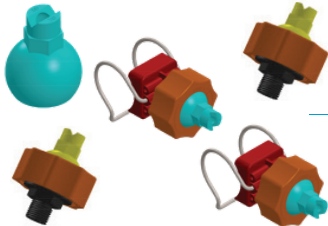

Pipework, Couplers & Adaptors

Uni-Spray's quick change system is a complete connector, nozzle holder and riser system for use in pre-treatment spray tunnels made from high-quality plastics. The whole system is designed to make the maintenance and cleaning of large pre-treatment tunnels as quick and easy as possible.

The range includes:

- Quik-disconnect couplers
- Saddle adaptors
- Header and riser pipework
- Riser supports

Nozzle Holders & Nozzles

To suit customer setups

- Adjustable nozzle holders
- Fixed clamp-on nozzle holders
- Adjustable threaded nozzle holders
- Snap on nozzle tip holders

Eductors

Eductors are a simple and cost-effective way to improve mixing and recirculation systems, using the Venturi effect to move around 5 times the volume of the pumped in liquid. Available in glass reinforced polypropylene or Kynar®/PVDF.

Additional Solutions

Air Nozzles and Safety Showers

THE
SPRAY NOZZLE
PEOPLE

THE
AIR NOZZLE
PEOPLE

Improve Compressed Air Efficiency, Productivity & Workplace Safety

Our compressed air enhancement products provide efficient, low-noise blow-off, cooling and drying while using less energy than traditional cleaning, drying and air-movement methods. These systems reduce reliance on liquid cleaning methods and manual intervention, improving safety, cleanliness and productivity across industrial processes.

Our range includes:

- Air Nozzles
- Air Knives
- Air Jets / Air Amplifiers
- Panel & Cabinet Cooling Products
- Mounting Accessories

Scan the QR code or click [HERE](#) to view the range on our website.

THE
SAFETY SHOWER
PEOPLE

Protect Employees, Support Compliance, Reduce Risk & Deliver Long-Term ROI

Our safety shower range is designed for reliable emergency performance, robust construction and ease of installation, with options to suit indoor, outdoor and hazardous environments. Built to meet recognised safety standards, these products are engineered for durability, low maintenance and dependable operation when every second counts.

Our range includes:

- Tank Showers
- Combined Shower & Eyewash Units
- Heated & Insulated Safety Showers
- Portable & Self-Contained Units

About SNP

**Delivering Hassle Reduction,
Improved Efficiency, Peace of Mind**

THE
SPRAY NOZZLE
PEOPLE

Whether you're aiming to **improve efficiency, enhance hygiene standards, cut costs across spray media, water, energy or labour, reduce maintenance and downtime or boost product quality**, SNP can help you achieve your goals.

We provide fully engineered spray systems, across all industries and applications, leveraging our expertise in spray nozzle technology and working backwards to ensure **you always have the optimal solution for your process**. We also supply individual spray nozzles and other accessories such as pumps, filters and pressure regulators, in addition to our IBC Cleaning Kit and clever washdown and sanitisation solutions.

How We Work With You

We support successful spray engineering projects from concept to completion, offering expertise in design, specification, installation support, upgrades and troubleshooting, **giving you complete peace of mind and a process that's as hassle-free as possible**.

And when you simply need a replacement or component fast, we supply spray nozzles and accessories quickly and efficiently, so you can keep things running without disruption.

Talk to our approachable and knowledgeable team today about your spray project.
